GASTRONORM

È la rivoluzione in cucina, perchè tutte le pezzature sono multipli e sottomultipli tra di loro, permettendo tutte le combinazioni dimensionali richieste dalla ristorazione. La compatibilità con la gamma in polycarbonato rende le due serie ancora più performanti nel trasporto, nella presentazione e la conservazione degli alimenti.

This is a kitchen revolution because all the sizes are multiples and submultiples of each other, giving all size combinations as required by the catering industry. Compatibility with the polycarbonate range means the two series perform even better in the transportation, presentation and conservation of food.
